Bare Metal Cloud

Cost effective, high performance Bare Metal architecture.

Integrated Netris network operating system including VPC, ELB, routing, NAT, DHCP, VPN, IPAM.

Build your private cloud on bare metal servers and provide services for edge computing, low latency trading, streaming, gaming, collaboration, and file sharing.

Expand your client base to include financial trading, credit card processing, insurance and healthcare.

Increase your profit margins by offering services that are in high demand for modernizing both public and private cloud infrastructure.

Silicon Valley Technology

Your business is our business. At Silicon Valley Technology we integrate Bare Metal Cloud technology utilizing the latest network operating systems, object storage and a complete range of Bare Metal Server options.

Bare Metal Cloud provides cost effective ultra-high CPU processing at an affordable cost.

Netris.io provides the network operating system for the BMC. Gateway services include are VPC, ELB, Firewall, edge routing, DHCP, NAT, and IPAM.

Netris.io
Value-added cloud-like Network Services for bare metal providers. Netris operating system for BMC provides modern routing, NAT, Elastic Load Balancer, Firewall, DHCP, VPC and IPAM services.

Minio.io
Minio is a high performance, S3 compatible object store. It is built for large scale AI/ML, data lake and data base workloads. It runs on-prem and on any cloud (public or private) and from the data center to the edge.
